

STATISTICAL APPENDIX

Tables from the real sector

- Table 1: Gross domestic product
- Table 2: Prices
- Table 3: Industrial production index
- Table 4: Employment and productivity in total economy
- Table 5: Wages
- Table 6: Budget of the Republic of Macedonia

Tables from the monetary sector

- Table 7: National bank of the Republic of Macedonia - balance sheet
- Table 8: Report form for other depository corporations (banks and saving houses)
- Table 9: Depository corporations survey - NBRM, other depository corporations (ODI-banks and saving houses)
- Table 10: Banks and saving houses' loans
- Table 11: Monetary aggregates and components thereof (non-government sector)
- Table 12: Claims of other depository corporations (banks and saving houses)
- Table 13: Liabilities of other depository corporations (banks and saving houses)
- Table 14: Report on weighted interest rates on deposits and borrowings
- Table 15: Interest rates of the National Bank of the Republic of Macedonia
- Table 16: Reserve requirements of banks and saving houses
- Table 17: Interest rates on government securities

Tables from the foreign exchange sector

- Table 18: Republic of Macedonia: balance of payments
- Table 19: Republic of Macedonia: balance of payments
- Table 20: Republic of Macedonia: balance of payments - services
- Table 21: Republic of Macedonia: balance of payments - income
- Table 22: Republic of Macedonia: balance of payments - current transfers
- Table 23: Republic of Macedonia: balance of payments - capital and financial account
- Table 24: Merchandise trade by sections of SITC and by end use
- Table 25: Foreign trade by countries
- Table 26: Stock of foreign direct investment in Republic of Macedonia by country
- Table 27: Stock of foreign direct investment in Republic of Macedonia by activity
- Table 28: International investment position of the Republic of Macedonia, as of the end of the period
- Table 29: International investment position of the Republic of Macedonia, as of the end of the period
- Table 30: Republic of Macedonia: gross external debt
- Table 31: Republic of Macedonia: gross external claims
- Table 32: Republic of Macedonia: net external debt position
- Table 33: Reserve assets
- Table 34: Exchange rates (average for the period)
- Table 35: Mid exchange rates (end of period)
- Table 36: Indices on effective exchange rate of the Denar

Methodological explanations

Table 1
Gross domestic product
in millions of denars (1997=100) and annual real growth rates (in%)

	GDP total	%	Agriculture, hunting, forestry and fishing	%	Mining and quarrying, manufacturing and electricity, gas and water supply	%	Construction	%	Wholesales and retail sales	%	Hotels and restaurants	%	Transport, storage and communications	%	Financial intermediation, real estate and other business and service activities	%	Public administration and defence	%

¹ Real value of GDP and value added by sectors from 1997q1 to 2002q4 are calculated on the basis of annual growth rates derived from values of constant prices with reference year 1997.

² Provisional value.

³ Estimated data.

*From January 2009 there is structural break in the wage data, due to the "gross wage" reform. Consequently, values for net and gross wages from January 2009 are significantly higher than in the previous period. On the other hand, growth rates for net and gross wages shown in the table correspond to data that are corrected for this structural break. The correction is done by the NBRM staff, assuming that the wage in January 2009 remains on the December 2008 level, and then multiplying this value with the official SSO monthly growth rates.

* Banks fulfill reserve requirement in Denars on averaging provision, while bank's reserve requirement in Euro and savings houses' reserve requirement in Denars is held on fixed basis.

** Percentage of amount calculated from liabilities in foreign currency, which is fulfilled in Denars. The remaining amount is reserve requirement fulfilled in Euro.

***Before July 11, 2009 the reserve requirement ratio on liabilities in domestic currency with FX clause was equal to the reserve requirement ratio on liabilities in domestic currency.

1/ Preliminary data.

a. Revision of data has been done in November 2010 in the following categories:

- for 2009 data: direct investment, income and other investment, due to inclusion of data from the annual FDI Survey DI 22 and improved coverage of credit indebtedness data;
- services and current transfers for 2009- as a result of improved coverage of data
- goods, services and trade credits data for 2008 due to the final data on foreign trade for 2008.

2/ Imports data are on fob basis in accordance with IMF V Balance of Payments Manual

Calculation of cif / fob factor as % of imports cif equals: 1993-20%, 1994-20%, 1995-20%,1996-14%,1997-10%,1998-5,02%,1999-4,86%, 2000-3,9%, 2001-4,2%, 2002-3,8% 2003-4,06%, 2004 , 2005, 2006, 2007-4,14%, 2008 and 2009-3,86%

Imports for 2006, 2007 and 2008 have been additionally adjusted with time adjustments for imports of electricity.

3/ Excluding monetary gold and exchange rate differences

1/ Preliminary data.

a. Revision of data has been done in November 2010 in the following categories:

- for 2009 data: direct investment, income and other investment, due to inclusion of data from the annual FDI Survey DI 22 and improved coverage of credit indebtedness data;
- services and current transfers for 2009- as a result of improved coverage of data
- goods, services and trade credits data for 2008 due to the final data on foreign trade for 2008.

2/ Imports data are on fob basis in accordance with IMF V Balance of Payments Manual

Calculation of cif / fob factor as % of imports cif equals: 1993-20%, 1994-20%, 1995-20%,1996-14%,1997-10%,1998-5,02%,1999-4,86%, 2000-3,9%, 2001-4,2%, 2002-3,8% 2003-4,06%, 2004 , 2005, 2006, 2007-4,14%, 2008, 2009 and 2010-3,86%. Imports for 2006, 2007 and 2008 have been additionally adjusted with time adjustments for imports of electricity.

3/ Excluding monetary gold and exchange rate differences

METHODOLOGICAL EXPLANATIONS

REAL SECTOR

Table no. 1 Gross domestic product

The data for the gross domestic product (GDP) are produced by the State Statistical Office of the Republic of Macedonia (SSO). GDP is computed on the basis of the annual accounts data from the Central Registry, SSO statistical research, data from the Ministry of Finance, Public Revenue Office and other sources.

Gross domestic product (GDP) at current prices, computed by the production approach, is the final result of the production activity of the resident production units. GDP is a sum of the gross value added of the institutional sectors or activities, expressed in basic prices, plus the turnover tax (i.e. value added tax) and import duties, less subsidies on products (which are not allocated to activities).

Quarterly GDP data are available since 1997. Quarterly GDP, calculated by the production approach, is expressed in constant prices. The data are presented by sector according to the National classification of economic activities (NACE).

Table no. 2 Prices

The price data are from the SSO.

The average monthly retail prices and the structure of the personal consumption are used as a base for computing the *Consumer price index (CPI)*.

The selection of the products whose prices are to be monitored is made on the basis of the products with a significant share in the retail turnover. Retail prices are the prices at which the products are sold in the retail trade and by the individual producers and service providers. Retail prices include VAT.

Consumer price index is based on a specific list of products and services for personal consumption of non-agricultural households and on the average monthly retail prices of those products and services. In other words, the individual price indices of specific products and services are weighted with their respective share in the personal consumption. In January 2007 two new categories are added to the CPI structure- "hotels and restaurants" and "miscellaneous services n.e.c".

Producer prices are monitored in the Monthly survey of producer prices of industrial products, C.41 in 200 industrial enterprises in the Republic of Macedonia. Enterprises are selected on the basis of their importance in the production.

The producer price of the industrial products is the price at which the producer sells the products to the regular buyers on the domestic market, loaded free on rail or truck where the producer is located, or it is the price based on which the producer deals with other producers in the sphere of trade. This price includes producers subsidies, but excludes commercial rebates, discounts, cash discounts and similar reductions offered by the seller. VAT is also excluded from the price.

Starting from January 2001 the Producer Price Index is computed in accordance with the NACE classification.

**Table no. 3 Industrial production index**

Industrial production data is from the SSORM. The industrial production data is collected by monthly reports delivered by the enterprises in the industrial sector, as well as by their units.

The production indices are computed on the basis of the monthly reports.

The data was collected according to the Uniform Classification of Economic Activity (UCEA) with the Annual Industrial Report till 1998 and with the Monthly Industrial report till 1999, whereas starting from 1999 and 2000, respectively, the data from the same reports is collected according to the National Classification of Economic Activities (NACE).

Production volume index is calculated on the base of production, by allocation of the specific products in appropriate industry, using:

- average monthly final production and production structure in the base year;
- total monthly production in the current year;
- nomenclature of industrial products for the monthly industrial production report;
- weighting coefficients for each product;
- weighting factors which show the structure of production, i.e. the share of each branch in the total industrial production in the Republic of Macedonia.

The *productivity of the industry* is calculated in the NBRM and it is based on data from the SSORM for the volume of the industrial output and the number of the employees in the industry (according to the LFS), on a quarterly basis.

Table no. 4 Employment and productivity in total economy

The source of the presented data for the *employment* is the Labour Force Survey (LFS) of the SSORM.

The LFS is the most extensive research of the economic activity of the population and its demographic, educational and other characteristics, after the Census research. The survey is conducted on the whole territory of the Republic of Macedonia and it is based on a sample of 10.000 households (7.200 households till the 2003) or 1,8% of the total number of households in the country. Until 2003, the LFS was conducted annually, whereas starting from 2004 it is conducted as a continuous weekly survey throughout the year and the processing of the data is on quarterly and on annual basis. The units under observation are persons aged from 15 to 79 years and the households. The LFS is prepared in accordance with international recommendations (ILO and Eurostat). Classifications applied: National classification of activities and National classification of occupations.

Working age population is consisted of all persons aged 15 years and over. Working age population is divided into active population and inactive population.

Active population (labour force) comprises the employed and the unemployed persons.

Inactive population comprises of:

- pupils and students
- retired persons
- housewives
- supported persons (by others or by the state or with a different kind of income such as rents or interests).

The employed in the *agriculture* comprise sectors A and B; the employed in the *industry* comprise sectors C, D, E and F; the employed in the *services* comprise sectors from G to O according to the NACE classification.

The *productivity in the economy* is calculated in the NBRM and it is based on data from the SSORM for the total GDP and the total number of employees in the economy (according to the LFS), on a quarterly basis.

Table no. 5 Wages

The data for the paid net and gross wages per employee are based on monthly reports provided by the business entities that are in private and other (social, state, collective and mixed) ownership with different activities in the Republic of Macedonia. The data are prepared by the SSORM.

Net wages refer to the monthly average incomes per employee, for fulltime work, shorter or longer than full-time (overtime) work. The total amount of paid net wages also comprise a compensation of the net wage from the company's assets (or other legal entity) for vacation, state holidays, paid absence no longer than 7 days, paid absence for additional training, for sick-leave no longer than 21 days, compensation for time spent in practice by invitation by a state authority, public protection etc.

Gross wages comprise the paid net wages for the reporting month, the paid personal income tax and the paid contributions for pension, disability and health insurance, for employment, professional illness and for water supply.

Starting from May 2001 the data for the wages are published according to the National classification of activities-NACE.

The wages in the *agriculture* comprise sectors A and B; the wages in the *industry* comprise sectors C, D, E and F; the wages in the *services* comprise sectors from G to O according to the NACE classification.

Table no. 6 Budget of the Republic of Macedonia (the Central government budget and the budgets of the funds)

The data for the budget are prepared by the Ministry of Finance of the Republic of Macedonia.

The Budget of the Republic of Macedonia comprises the Central budget and the budgets of extra-budgetary funds.

The Central budget, that refers to the Central government, comprises the base budget, the budget of the self-financed activities and the budgets of loans and donations.

The extra-budgetary funds are: the Pension and Disability Insurance Fund, the Health Insurance Fund, the Employment Service Agency and the Road Fund.

MONETARY SECTOR

The data in the aggregate balance sheet of other depository corporations (banks and savings houses) and the balance sheet of the National Bank of the Republic of Macedonia (NBRM) have been disaggregated in line with the sector and currency criterion and according to the financial instrument underlying the creation of certain claims and liabilities. The data in the presented balance sheets refer to end balances at the end of the reference period. The amounts denominated in foreign currency have been converted according to the middle Denar exchange rate at the end of the reference period, applying the indicative NBRM exchange rate.

In the sector-by-sector classification defined in the IMF Monetary and Financial Statistics Manual (in consistence with the sector delineation provided in SNA93 and ESA95), the clients are divided into two basic groups: residents and nonresidents. The group of residents consists of five sectors: financial corporations, nonfinancial corporations, government, households and nonprofit institutions serving households.

- The financial corporations sector consists of five subsectors:
 - National Bank of the Republic of Macedonia (monetary authority),
 - Other depository corporations (banks and savings houses),
 - Other financial corporations,
 - Insurance companies and pension funds,
 - Other financial intermediaries other than insurance companies and pension funds and auxiliary financial corporations;
- Nonfinancial corporations sector consists of two subsectors: public nonfinancial corporations and private nonfinancial corporations.
- Government sector is disaggregated to central government (Budget and central government bodies, social insurance funds and other funds and agencies, and public sector institutions (schools, hospitals, etc.)); local government.
- Household sector consists of individuals and self-employed individuals.
- Sector of nonprofit institutions serving households include nonprofit and nonfinancial institutions (institutions of social and humanitarian nature, chambers of commerce, political parties, citizen associations, religious communities, trade unions, Red Cross).

For the purposes of monetary balance sheets, the household sector and the nonprofit institutions serving households are presented jointly as a sector of other residents.

The National Bank of the Republic of Macedonia and other depository corporations (banks and savings houses) constitute the depository corporations of the Republic of Macedonia.

The depository corporations' assets and liabilities are classified in the following aggregated categories: monetary gold and special drawing rights (SDR), currencies and deposits (including the transferable deposits and other deposits), securities other than shares, loans, shares and other equities, other claims and liabilities (including the trade credits and other accounts).

Table 7. National Bank of the Republic of Macedonia - Balance Sheet

The NBRM balance sheet is prepared on the basis of accounting records of all NBRM assets and liabilities to other economy sectors, including the nonresident sector. The NBRM balance sheet is published at the end of the month, including data on the preceding month.

A. NBRM balance sheet assets include the following categories: foreign assets, claims on government and other assets.

The NBRM foreign assets consist of foreign reserves and other foreign assets. Foreign reserves consists of monetary gold, foreign currency in the form of cash foreign currency, transferable and other NBRM deposits in foreign banks, placements in securities issued by nonresidents (in foreign currency), placements in foreign currencies with international financial institutions and holding of Special Drawing Rights (SDR). Other foreign assets include other foreign currencies, checks, transferable and other foreign currency deposits, foreign currency securities and shares and other claims on nonresidents in Denars and in foreign currency which are not a part of the foreign reserves.

NBRM claims on the Central Government pertain to the relations with IMF (allocation of SDR and claims based on replaced IMF loans) and claims based on placements in securities. The placements in securities are a specific category. The issue of such securities is one of the mechanisms in the bank rehabilitation process for assuming the bad placements in the book of one bank. These securities are held by the Bank Rehabilitation Agency. They are depreciated under the agreement between the Government and the Central Bank.

Other NBRM assets include NBRM claims on other sectors based on its current operations, fixed assets, special purpose assets and according to special regulations, stock, inflows from interests, doubtful and contested claims on interest and fees.

B. The NBRM balance sheet liabilities consist of reserve money, currency held by other depository corporations, other NBRM liabilities to other depository corporations, restricted deposits, foreign liabilities, Central Government's deposits and other NBRM liabilities.

Reserve money includes currency in circulation, cash in the vault, banks and savings houses' accounts with the NBRM, other financial institutions' accounts with NBRM (mainly the deposit insurance fund). The currency in circulation is NBRM liability and includes currency in circulation held by nonbanking entities. The banks' accounts with NBRM consist of banks' accounts with NBRM (including the savings houses) and deposited Denar reserve requirement of other financial institutions with NBRM and allocated banks' foreign currency reserve requirement. The reserve requirement is calculated by using the defined reserve requirement rates applied to the average monthly balance of the respective deposits. Average system form reserve requirement maintenance is in place, according to which the bank may use the reserve requirement to maintain the daily liquidity up to 80% of the liability. The data on the currency in circulation are taken from the NBRM Central Bank Operations Department, and the data on banks and savings houses' daily liquidity are based on their daily reports submitted to the NBRM.

Currency held by other depository corporations includes cash in the vault of the banks and the savings houses.

Other NBRM liabilities to other depository corporations primarily include the NBRM liabilities on issued CB bills. The CB bills auctions are the basic instrument of the NBRM monetary policy used for regulation of the global liquidity level and interest rates in the banking system, and for signaling the monetary policy guidelines. They were introduced for the first time in February 1994, and by definition have been intended for withdrawing liquidity from the banking system. The interventions with this instrument with maturity of 28 days have been carried out by auctions that could be organized as volume tender or interest rate tender (US type). The CB bills auctions lays upon market and flexible base, which ensures their permanent alteration, for increasing their efficiency and successful achievement of their established goals.

Central Government deposits include government demand deposits in Denars (treasury account of the government and other budget funds) and in foreign currency (deposits for special purposes on central government level and other deposits). Since March 2006, Denar government deposits also include cash mobilized through the issue of **treasury bills for monetary purposes**, deposited on a special account. On March 7, the NBRM in cooperation with the Ministry of Finance started issuing 3-month treasury bills for monetary purposes. The treasury bills for monetary purposes have been issued on regular government securities auctions, with same features as the regular government securities. According to the Law on Public Debt, the treasury bills for monetary purposes are not considered a part of the public debt, because they have been issued for monetary policy purposes. In addition, the government has no right to make the withdrawn funds available by issuing treasury bills for monetary purposes. The interest rate on treasury bills for monetary purposes has been charged to the NBRM, according to the average interest rate reached at the 3-month treasury bills. For regulating the mutual relations, the Ministry of Finance and the NBRM have concluded an Agreement on treasury bills for monetary purposes.

Foreign liabilities include NBRM liabilities to nonresidents based on checks and foreign currency L/Cs, and liabilities on used loans from the International Monetary Fund. This category also includes SDR allocation.

Other NBRM liabilities include capital accounts consisting of NBRM own funds, retained earnings, current year financial result, general and specific impairment and special reserve and valuation adjustments. This category also unclassified NBRM liabilities arising from various business relations with resident sector.

Table 8. Report form for other depository corporations (banks and saving houses)

The balance sheet of other depository corporations has been prepared on the basis of accounting records submitted by the banks and the savings houses (KNBIFO), being aggregate balance sheet assets and liabilities of all other depository corporations. The monthly balance sheet of other depository corporations has been published at the end of the month, containing data on the preceding month. The balance sheet includes data on the claims and liabilities (holders of monetary aggregates, as defined by the national definition) of other depository corporations (except for NBRM) to other sectors in the economy, including the nonresident sector. The data have been classified in standardized components by sector, financial instrument and accounting principle.

A. Assets in the balance sheet of other depository corporations include currencies and deposits, securities other than shares, loans, shares and other equities, financial derivatives, other claims, nonfinancial assets.

Currencies and deposits have been divided by currency structure in Denars and foreign currency. Currencies include banknotes and coins in the vaults of other depository corporations issued by the central bank and foreign currencies issued by central banks of foreign states. Deposits consist of transferable deposits which include current accounts of other depository corporations with NBRM (which also include their reserve requirement in Denars deposited with NBRM) and bank accounts abroad. The group of deposits includes sight deposits, savings and other deposits (which also include the banks' compulsory deposit with NBRM).

Securities other than shares have been classified by currency structure and sector and include CB bills, treasury bills, government bonds, corporate bonds, commercial securities, transferable deposit certificates, etc.

Loans refer to assets provided to various sectors by other depository corporations. Loan data include accrued interest, whereas the expected losses, loan loss provisions and impairments have been excluded from this category. According to the currency distribution, the loans have been classified to Denar and foreign currency.

Shares and other equity include financial instruments which supply the holder with the right of ownership of the company of issue.

Other claims include trade credits and advances which refer to financial services provided by other depository corporations to other financial and nonfinancial corporations. This category includes all other items not included in other categories of financial instruments, and consists of dividends, settlement account, items in process of collection, etc.

Nonfinancial assets include tangible (fixed assets, stock, etc.) assets and intangible assets for which no respective liabilities have been recorded (patents, licenses, software, etc.).

B. Liabilities of other depository corporations include liabilities arising from accepted deposits, received loans, issued securities, other liabilities and shares and other equities.

Deposits are differentiated into deposits included and excluded from the broad money, further classified into Denar and foreign currency deposits.

Deposits included in the broad money contain transferable deposits and other deposits of domestic depository corporations included in the national definition of broad money. This category includes deposits of other financial corporations, nonfinancial corporations, households, nonprofit institutions serving households and local government.

Deposits excluded from the broad money include transferable and other government deposits (except for the local government), depository corporations and nonresidents deposits.

Securities other than shares include commercial securities issued by other depository corporations for the purposes of strengthening the total financial potential.

Loans include funds provided to other depository corporations by various institutional sectors.

Other liabilities include trade credits (received for purchasing goods and services from households, nonprofit institutions and nonfinancial corporations) and advances received for current operations or operations about to start, and advanced payments for goods and services. This category also includes settlement accounts, liabilities on dividends, loss provisions for impaired financial assets, accumulated depreciation and losses arising from impairment and other liabilities. Other liabilities include all accounts n.e.c. in the balance sheet of other depository corporations.

Shares and other equity have been divided into equity investments, retained earnings, financial result from current year, general and specific impairment of value and special reserve and valuation adjustments.

Table 9. Depository corporations survey - NBRM, other depository corporations (ODI - banks and savings houses)

The survey of depository corporations is a consolidated survey of the accounts of banks, savings houses and NBRM, showing the combined assets and liabilities of the monetary system with respect to other resident and nonresident entities. Basic source of preparation of the survey of depository corporations are the NBRM survey and the survey of other depository corporations.

As a consolidated balance sheet of the monetary system, it is a basis for its continuous monitoring. Simultaneously, the survey also provides an analysis of the interactions of the basic macroeconomic sectors: the real, fiscal, external and the monetary sector.

The monthly survey of depository corporations has been published at the end of the month, containing data on the preceding month.

Major components of the Survey of depository corporations are the net foreign assets, domestic credits, money, deposits (restricted and other), liabilities to other financial corporations, capital accounts and other items (net).

Net foreign assets is the difference between the foreign assets and liabilities of the NBRM and other depository corporations (banks and savings houses). All foreign assets and liabilities of the NBRM and other depository corporations have been aggregated and presented as net foreign assets of the monetary system.

Domestic credits include claims of the depository corporations (NBRM, banks and savings houses) on government (recognized on a net basis), claims on local government, public nonfinancial corporations, private sector and other financial corporations (recognized on a gross basis).

Claims on central government include claims on loans, securities and trade credits and advances. Sources of loans to the Government include foreign loans, credit lines, deposit potential and other sources. Claims on Government based on securities include claims on specific securities (issued by the government in the process of rehabilitation of one bank, bonds issued for the old foreign currency savings).

Claims on local government include claims on local currency credits.

Claims on public nonfinancial corporations include claims on local and foreign currency loans to public enterprises.

Claims on private sector include total placements of depository corporations to the private sector based on approved loans, placements in securities and shares and other placements. Claims on private sector contain claims on other nonfinancial corporations, claims on households and claims on nonprofit institutions serving households.

Claims on other financial corporations include total placements of depository corporations based on approved loans, placements in securities and shares.

Money includes currency in circulation (currency outside other depository corporations), demand deposits of the local government and other financial corporations with NBRM and demand deposits of the sector of money holders with banks and savings houses.

Restricted deposits include deposits restrictedly used for a purpose specified by regulation. These deposits are intended for covering open L/Cs in the external payment operations, guarantees, bank remittances, etc.

Other deposits include time, savings and foreign currency deposits of sectors included in the definition of the broad money, with NBRM, banks and savings houses.

Liabilities to other financial corporations include total depository corporations' liabilities on deposits, securities and received loans.

Capital accounts unite the capital accounts of NBRM, banks and savings houses.

Other items (net) recognize all categories not included in the previously presented categories and all unclassified assets and liabilities of the depository corporations.

Table 10. Banks and savings houses' loans

Loans approved by other depository corporations to nongovernment sector have been classified by currency: loans in Denars and in foreign currency. They are further classified into short-term and long-term loans, accrued interest and doubtful and contested claims. Short-term and long-term loans have been divided in to loans with and without currency clause. Loans to nongovernment sector include loans to the following sectors: nonfinancial corporations, households, nonprofit institutions serving households, local government and other financial corporations.

Table 11. Monetary aggregates and components thereof (non-government sector)

Monetary aggregates, as a sum of financial instruments classified by liquidity level, have been defined in a manner compatible with the internationally accepted definitions and criteria (as specified by the IMF Methodology for monetary and financial statistics). Deposits included in monetary aggregates consist of the following sectors: other financial corporations, local government, nonfinancial corporations (private and public), households (individuals and self-employed individuals) and nonprofit institutions serving households.

Money supply M1 includes currency in circulation and demand deposits. Demand deposits, however, include current accounts with banks and savings houses and current accounts of other financial corporations with NBRM.

Currency in circulation is the difference between the total amount of banknotes and coins and the amount of cash in the banks' vaults, in the NBRM's vault and in the dispersed vaults.

Money supply M2 (liquid assets) includes the monetary aggregate M1 and short-term deposits. Short-term deposits have been defined as deposits which include sight deposits, time deposits with maturity of up to one year, in Denars and in foreign currency.

Money supply M4 (total deposit potential of the monetary system) includes monetary aggregate M2 and short-term deposits, i.e. deposits with maturity of over 1 year, in Denars and in foreign currency.

Table 12. Claims of other depository corporations (banks and savings houses)

Claims of other depository corporations include loans, placements in securities, shares and overdue claims and doubtful and contested claims on loans. Placements of other depository corporations have been decomposed by sector, maturity and currency. According to the accepted standards of the monetary and financial consolidation statistics i.e. exclusion of the mutual claims and liabilities within a sector, the placements exclude the interbank claims.

Claims of banks and savings houses on nonfinancial corporations (private and public) include claims on loans, accrued interest on loans, overdue claims and doubtful and suspicious and contested claims on loans, securities and shares. All categories have been differentiated by currency, and the loans have also been differentiated by maturity. Other depository corporations approve loans from various sources of funding: deposits, own sources, foreign credits, received credit lines and other sources. Claims on securities include claims on short-term securities (checks and notes) and claims on long-term securities, i.e. holdings or investments of the banks and savings houses in securities of nonfinancial corporations. Claims which form the category of shares include financial instruments which supply other depository corporations with the right of ownership of the issuing nonfinancial entity.

Claims of banks and savings houses on households (individuals and self-employed individuals) include claims on loans, accrued interest on loans, overdue claims and doubtful and contested claims on loans. Claims on households have been differentiated by currency, maturity and purpose. By purpose, the loans have been disaggregated to consumer loans, auto loans, housing loans, credit cards and overdrafts, other loans and loans of self-employed individuals.

Claims of banks and savings houses on nonprofit institutions serving households, other financial corporations and local government include claims on loans, accrued interest on loans, overdue claims and doubtful and contested claims on loans, claims on securities, and claims on shares.

Claims of other depository corporations on Government include claims on loans, accrued interest on loans, overdue claims and doubtful and contested claims on loans, claims on securities, and claims on shares. Sources of loans to the Government include foreign loans, credit lines, deposit potential and other sources.

Liabilities on Government based on securities include claims on specific securities.

Table 13. Liabilities of other depository corporations (banks and savings houses)

According to the dominant classic deposit and credit activity of **other depository corporations, the liabilities to nonfinancial corporations** include deposits of nonfinancial

corporations and loans received from nonfinancial entities. Besides deposits and loans, this category also includes securities issued by nonfinancial entities. Deposits have been disaggregated by their maturity and currency structure. Loans and securities have been differentiated by their currency structure.

Liabilities of other depository corporations to households include current accounts, sight deposits, time deposits (up to three months, over three months, up to one year and over one year) and restricted deposits intended for covering L/Cs in the domestic payment operations.

Liabilities of other depository corporations to other clients - nonprofit institutions serving households, to local government, other financial corporations and liabilities to government, respectively. The above are liabilities on various types of deposits differentiated by their maturity and currency structure, and liabilities on securities and other loan liabilities in Denars and foreign currency.

Table no. 14 Report of weighted interest rates on granted loans and received deposits of deposit money banks

Based on a Report on weighted interest rates on deposits and borrowings, which the deposit money banks submit to NBRM on regular monthly basis, aggregated survey on weighted interest rates of deposits and borrowings in Denar and in foreign currencies is prepared.

Interest rates on Denar credits include: interest rates on Denar credits without FX clause and interest rates on Denar credits with FX clause.

Interest rates on Denar deposits include: interest rates on Denar deposits without FX clause and interest rates on Denar deposits with FX clause.

Denar credits/deposits are further categorized by two criteria: sectoral classification and maturity. By sectoral classification, they are divided to: credits/deposits which refer to enterprises, credits/deposits which refer to the households. By maturity, the credits are divided to: short-term and long-term; and the deposits: sight deposits, short-term and long-term time deposits.

Foreign currency credits/deposits are classified by three criteria: by sector, by currency and by maturity. By sector classification, they are divided to: credits/deposits which refer to enterprises, credits/deposits referring to households. By maturity, credits are divided to: short-term and long-term; and the deposits to: sight deposits, short-term and long-term time deposits. By currency, they are divided to: credits/deposits in euros and in USA dollars.

Interest rates on credits and deposits are in percents on annual level.

Table no. 15 Interest rates of the National Bank of the Republic of Macedonia

1. Discount rate is valid interest rate in the current month.
2. Interest rate on credits over night - Lombard credit is the valid interest rate in the current month.
3. Interest rate on repo transactions for creating liquidity in the banking system is shown as average weighted interest rate achieved at the auctions in that month.
4. Interest rate on CB bills is shown as average weighted interest rate achieved at the auctions with maturity of 28 days in that month. The interest rate is differentiated by the type of tender which can be: volume tender or interest rate tender.

5. Interest rate on repo transactions for liquidity withdrawal from the banking system is shown as average weighted interest rate achieved at the auctions in that month.

Table no. 16 Reserve requirement of banks and saving houses

Banks and saving houses allocate reserve requirement based on the average deposit stock in the previous month. The period of maintaining the reserve requirements covers the period from the 11th in the current month to the 10th in the following month. The fulfilling of the banks' reserve requirement in denars is on average basis, whereas the saving houses' reserve requirement in denars and the banks' reserve requirement in foreign currency are on fixed basis.

Table no.17 Interest rates on Government securities

Interest rates on Government securities are shown as average weighted interest rate achieved on the auctions in the adequate month with fixed maturity.

FOREIGN EXCHANGE SECTOR

Table no. 18-23 BALANCE OF PAYMENTS

Balance of payments is a statistical statement that systematically summarizes, for a specific time period, the economic transactions of the Republic of Macedonia with the rest of the world.

According to the Law on the National Bank of the Republic of Macedonia and the regulations in the area of foreign exchange operations, the National Bank of the Republic of Macedonia (NBRM) is responsible for compiling and monitoring of the execution of the Balance of payments.

Statistics of the Balance of payments of the Republic of Macedonia is prepared basically in accordance with the methodology of the International Monetary Fund (Balance of Payments Manual, fifth edition - BPM 5). The data are disseminated (issued) on monthly basis, in millions of euros and USA dollars. The transactions which are denominated in other currencies are converted in euros and USA dollars equivalent to the exchange rate on the day of the transaction.

The main sources of data for compiling the balance of payments are the following:

- the single administrative document (SAD) for the foreign trade of the Republic of Macedonia;
- the system for reporting on the banks' international payment operations (ITRS);
- the system for reporting on the external debt (from the credit indebtedness);
- the banks' reports on the stock of assets and liabilities (the banks' report on the deposit money banks book keeping stock);
- the monthly reports on stocks and flows (changes and stocks) on the accounts abroad of the residents which are not authorized banks and the stock and flow on settlement accounts (monthly reports-MR);
- additional NBRM's reports on the realized turnover in exchange offices and on the official foreign exchange reserves stock of the Republic of Macedonia;
- data from the annual direct investment survey - DI 22.

BALANCE OF PAYMENTS: SEPARATE ITEMS

CURRENT ACCOUNT

Goods

The source of data on the foreign trade of the Republic of Macedonia is the SAD, which is prepared by the Customs Administration of the Republic of Macedonia, and it is processed and published by the State Statistical Office of the Republic of Macedonia and the NBRM.

In accordance with the methodology on recording the foreign trade in the trade statistics, the State Statistical Office is publishing the data for the exports on the f.o.b. basis, while regarding the imports, on the c.i.f. basis.

Adjustment for the coverage and classification are made for good's item in the balance of payments in line with the recommendations given in the BPM5, especially regarding the following:

- coverage: regarding the return of goods and the invoiced value of the performed service for the repair of goods;
- classification: regarding the c.i.f./f.o.b. factor and processing of goods. In the balance of payments, both the exports and the imports are presented on f.o.b. basis, because of which an adjustment of the c.i.f. imports for c.i.f./f.o.b. factor is necessary. In the period from 1993 to 1997, the c.i.f./f.o.b. factor was determined on the basis of the average internationally set rates for calculation of these expenses. Since 1998, the c.i.f./f.o.b. factor is calculated on the basis of established methodology based on the SAD data on transport and insurance of the parities with a destination in the Republic of Macedonia adjusted to the overall imports.

The item import of goods in ports by carriers is based on data from the monthly reports - MR.

Services

Transportation: The data that refer to the transportation are taken from the ITRS and the monthly reports MR. There is a possibility for making a desegregation by the type of transport (air, sea, railway and road), and on the basis of the category of services (freight, passengers and other). The adjustment is made for the outflow of transportation services (transport of goods) regarding the c.i.f./f.o.b. factor that refers to the costs of transport of goods provided by non-residents.

Travel: The data originate from the ITRS and the monthly reports-MR.

Other services: The data are taken from the ITRS for the receipts from and payments to non-residents on the basis of type of services: telecommunication, construction, insurance, business, government and other services. The adjustment is made for the insurance outflow regarding the c.i.f./f.o.b. factor that refers to the costs insurance of the transport of goods. Additional source on data for certain types of services are the data from the monthly reports – MR.

Income

The income as a balance of payments' component originates from: compensation of employees (residents employed with non-residents and vice versa) and investment income. Investment income represents a capital gain from the direct investment, portfolio investment and other investment (dividends, loan and credit interests, etc.).

Direct investment income: The data include dividends and distributed branch profits, as well as reinvested earnings and undistributed branch profits. Major data source for the receipts and payments of dividends is the ITRS. For the previous years a basic data source for reinvested earnings is the annual direct investment survey, while for the current year estimates are based on data from the previous years.

Portfolio investment income: Data on inflow include interest receipts on foreign debt securities and accrued interest on foreign debt securities as part of the gross official reserves. Data on outflows include dividends paid on equity securities and interest paid on debt securities. The data sources are the ITRS, the NBRM's reports on the official foreign exchange reserves stock and the annual direct investment survey.

Other investment income: The data include received and paid interest on the deposits, short-term, medium-term and long-term loans and credits. The received interest consists of the inflows of interest on foreign currency deposits on the foreign accounts (interest on the foreign exchange reserves and on the foreign exchange assets of the banks). The data sources are the ITRS and the NBRM's reports on the official foreign exchange reserves stock. The paid interests refer to the due current liabilities on disbursed medium-term and long-term foreign loans and credits. The source of data is external debt reports, which are obligatorily recorded in the NBRM (credit indebtedness).

Current transfers

The official transfers mainly refer to the assistance in financial assets and goods received by foreign governments and international organizations. The source of the data for the transfers in financial assets is the ITRS, while regarding the transfers in goods is the customs administration documents.

The private transfers consist of: remittances, cash exchanged and other transfers of which the most are rents. The source of data is the ITRS. Cash exchanged on the exchange market in accordance with the BPM5 should be classified in the capital and financial account of the balance of payments. However, regarding the fact that the largest part of these assets originates from the residents' receipts from non-residents on the basis of provided goods and services (unrecorded transactions) and transfers received in cash foreign currency, these transactions are recorded as a part of the balance of payments' current account (private transfers).

CAPITAL AND FINANCIAL ACCOUNT

CAPITAL ACCOUNT

This account encompasses the capital transfers for which main source of data is the ITRS.

FINANCIAL ACCOUNT

Direct investment: The direct investment include equity, reinvested earnings and other capital. Trade credits, long-term and short-term loans between affiliates are recorded under other capital. Basic data source for the previous years is the annual direct investment survey DI 22. The source of data for the investment in financial assets is the ITRS, while regarding the investment in goods is the customs administration documents. For the current year data on reinvested earnings and other capital are estimates based on data from the previous years. Loans within other capital are based on the system for reporting on the external debt and claims.

Portfolio investment: The source of data for the portfolio investment is the ITRS. Additional data source for the previous years is the annual direct investment survey DI 22.

Other investment:

Trade credits: The trade credits (extended to and received from foreign countries) represent a differential between the exports/imports of goods and the corresponding settlements. The estimated data for the trade credits are derived from the foreign trade data in the administration customs documents and corresponding settlements from the ITRS. If the value of the exported goods is higher than the value of receipts on exports, the difference is recorded as an extended trade credits (with a negative sign). If the value of imported goods is higher than the payments on the imports, the difference is recorded as a received trade credits (with a positive sign). Additional source of data are the data from the monthly reports – MR.

Loans: Within the “loans” category, disbursements and amortization on medium-term and long-term loans and credits are recorded. Principal and interest arrears are also recorded as a counter-entry in the category other investment – other. The data are based on the reports on medium-term and long-term public and private external debt prepared by the NBRM, which are obligatory recorded in the NBRM.

Currency and deposits: The data primarily refer to the changes in the foreign exchange assets and foreign exchange liabilities of the banks. The sources of data are the monthly bank's reports on the deposit money banks' book-keeping stock and the ITRS. The changes of foreign exchange assets and foreign exchange liabilities of the banks are showing with partly excluding of valuation changes. The changes of foreign exchange assets of individuals include net cash deposited on foreign exchange accounts with the banks, reduced for the imports of goods by the individuals. The source of data for net cash deposited on foreign exchange accounts with the banks is the ITRS and for imports of goods is the SAD. Additional source of data on currency and deposits for other sectors are the data from the monthly reports – MR.

Gross official reserve assets: The data refer to the changes in the stock of the official foreign exchange reserves. The source of data are the reports of the NBRM regarding the foreign exchange reserves stock calculated according to the exchange rate on the date of the reporting period.

Table no. 24 and 25 Foreign trade

The source of the data regarding the foreign trade is the State Statistical Office of the Republic of Macedonia. The data on the international trade of goods of the Republic of Macedonia is prepared in accordance with the main statistical standards, definitions and recommendations of the UN regarding the concepts and definitions of the foreign trade statistics. The data relating to the exports are published on f.o.b., while those relating to the imports, on c.i.f. basis.

Table no. 26 and 27 Stock of foreign direct investment

The calculation and dissemination of foreign direct investment (FDI) data worldwide is based on the methodological recommendations of the Balance of Payments Manual-fifth edition, IMF 1993 and The OECD Benchmark Definition of Foreign Direct Investment-third edition, OECD 1996. In accordance with these recommendations, FDI include:

- equity and reinvested earnings;
- claims on direct investors/affiliates abroad;
- liabilities to direct investors/affiliates abroad.

Methodologically, the reinvested earnings include:

- part of the profit distributed in equity;
- part of the profit distributed in reserves;
- part of the profit distributed for loss coverage from the previous period;
- undistributed earnings;
- uncovered losses;
- losses from previous periods, transformed into claims on the investors;
- earnings from previous periods, transformed into liabilities to the investors.

According to the recommendations of the Balance of Payments Manual-fifth edition, the criterion for classifying a transaction as a direct investment is a minimum 10% of equity participation on the right to vote. Accordingly, the distinction between a portfolio and direct investor is based on the percentage of owned shares in the company.

The methodology applied to calculate foreign direct and portfolio investment in the Republic of Macedonia corresponds fully with the methodologies applied by the member countries of the IMF and OECD.

The FDI data in the Republic of Macedonia are disseminated by the country of the investor and the type of activity of the direct investment company.

Table no. 28 and 29 International investment position

The international investment position is a statistical report which presents the position and the structure of the financial claims (assets) of residents on non-residents and the financial liabilities of residents to non-residents arising from their operations. In other words, the international investment position is a balance sheet of the international financial assets and liabilities of a country on a certain date, often at the end of the year.

International financial assets of the country comprise of the direct and portfolio investments of resident legal entities and natural persons in other countries including the investments in financial derivatives, other investments of residents abroad in the form of extended loans and credits, foreign assets of resident banks with foreign commercial banks, as well as the official foreign reserves. International financial liabilities of the country comprise of the liabilities based on direct and portfolio investments of non-resident legal entities and natural persons in the country including the investments in financial derivatives, liabilities on the basis of other investments of non-residents in the country in the form of used loans and credits, and liabilities on the basis of deposits of foreign legal entities and natural persons with resident banks.

The difference between the total international financial assets and liabilities presents the net-international investment position of a country. This means that the international investment position of the Republic of Macedonia is a difference between the investments of residents with non-residents (its international assets) and the investments of non-residents with residents (its international liabilities).

Direct investments are investments by which the investor intends to establish a permanent economic link and/or to exercise right to manage the legal entity it invests in. In line with the international recommendations and standards, a minimum share of 10% in the capital or voting right in the legal entity the investment is made in, is used as a criterion for defining direct investments. Direct investments include shareholders' capital, reinvested gain and the debt of connected entities. Source of data on direct investments for compiling the international investment position of the Republic of Macedonia are the questionnaires - reports on the condition and the turnover of the connected entities which all resident legal entities submit to the NBRM on annual basis, and are related to the investments to and from other countries.

Portfolio investments include the investments in debt securities and in equity instruments, where the investor owns less than 10% of the shareholders' capital or does not have voting right. Source of data on the investments in equity instruments for compiling the international investment position of the Republic of Macedonia are the annual questionnaires - reports on the condition and the turnover of the connected entities, while for the investment in debt securities data are used on the international payment operations of commercial banks (in line with the Reporting system for international transactions), reports on operations with securities from the authorized participants in the Macedonian Stock exchange, as well as the data base of the Central Securities Depository. For calculation of the market value of the securities, data on the market prices from the Macedonian Stock Exchange are used.

Other investments include the assets and the liabilities on the basis of short-term and long-term financial and trade credits and loans, currencies and deposits and other assets and liabilities. In line with the Balance of Payments Manual of the IMF, trade credits denote claims and liabilities arising from international commercial operations of residents (on the basis of import/export of goods and

services, advance payment, etc.) Source of data on the trade credits for compiling the international investment position of the Republic of Macedonia are the quarterly reports on the claims and liabilities on the basis of international commercial operations of residents (KIPO Form), while for the financial credits and loans records of registered foreign credits are used (KZ and KO Forms). Currencies and deposits include the deposits which resident banks keep abroad, i.e. liabilities of resident banks to non-residents. Sources of data for this item are the monthly balance sheet of the commercial banks and international payment operations of banks.

Table no. 30-32 Gross external debt, Gross external claims and Net external debt

General methodological notes

The National Bank of the Republic of Macedonia (National Bank) is the institution responsible for recording and monitoring of the external debt of the Republic of Macedonia in accordance with the legislation i.e. the Law on the National Bank of the Republic of Macedonia and the Foreign Exchange Law.

The external debt statistics is prepared in accordance with the External Debt Statistics Guide¹ (Guide).

Gross external debt

Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and /or interest by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy. According to this definition, gross external debt at a certain date is the stock of all future liabilities of residents to nonresidents, future installments of principal, arrears in principal and interest, as well as late (default) interest, regardless of the type of instrument and maturity.

Gross external claims

Gross external claims are the stock of all current, not contingent claims based on debt instruments, of residents from nonresidents. Basically, the definition of gross external claims is identical with the definition of gross external debt, having in mind that the claims of one economy are liabilities for other.

Net external debt

Net external debt is defined as the difference between the stock of gross external debt and gross external claims. In its structure, net external debt is identical with the gross external debt, where the standard presentations contains classification by institutional sectors, maturity and debt instruments.

According to the Guide, the basic classification of debt is among the four basic institutional sectors of an economy:

- general government (government units that exist at each level—central and local—of government within the national economy and all social security funds operated at each level of government);
- monetary authorities - (the central bank or other institution carrying out the operations of a monetary authority);
- banking sector (financial intermediaries carrying out activities of taking deposits and extending credits);
- other sectors (non-bank financial intermediaries, non-financial corporations, households and non-profit institutions serving households).

¹ External Debt Statistics: Guide for compilers and Users, IMF, 2003

Furthermore, within each of the sectors, debt is classified by maturity, on short term (with original maturity of one year or less) and long term (maturities of more than one year). On the third level of disaggregation, debt is distributed amongst the standard types of debt instruments, such as:

- trade credits - consist of claims or liabilities arising from the direct extension of credit by suppliers for transactions in goods and services, and advance payment by buyers for goods and services and for work in progress (or to be undertaken);
- loans - include those claims or liabilities created through the direct lending of funds by a creditor (lender) to a debtor (borrower) based on a credit agreement;
- debt securities - creation of debt or a claim through the issuance/purchasing of securities as part of the portfolio investment in the country, being traded on organized markets or over-the-counter;
- currency and deposits - currency (notes and coins) are claims on a central bank or a government that have issued them, from the nonresident holders. Liabilities on deposits are liabilities of the financial institutions that take deposits to nonresident depositors, while claims on deposits arise from the funds deposited with nonresident financial institutions; and
- other - other claims and liabilities, not included under previous debt instruments. An important category within this item are arrears, that have a treatment of short-term claims/liabilities, as they are considered to be immediately due and are a cumulative amount of arrears on all previously mentioned instruments.

Direct investment - intercompany lending claims or liabilities are shown separately. The separation of these claims/liabilities within net external debt is significant in view of the necessary compatibility with the IIP statement, where these claims/liabilities are incorporated within the item Direct investment (Other capital).

From the aspect of valuation, the Guide recommends the nominal value to be used for all debt instruments, except debt securities, where it is recommended to use the market value of debt. This is entirely consistent with the methodological recommendations for the compilation of the IIP of a country.

Stock data, repayment schedules, arrears and new commitments are converted into the unit of account using the mid exchange rate of the National Bank at the cut-off date. Flow data, disbursements and repayments, are converted into the unit of account using the mid exchange rate of the National Bank on the day of the transaction.

The stock of debt is a result of disbursements, decreased for the amortization (repayments of principal), increased for the amounts of capitalized interest in arrears and default interest. Having in mind the fact that stock data are converted using the end period exchange rate, while the flow data are converted using the transaction date exchange rate, discrepancies between debt stock at end-period and beginning of period differ from the net flows, as they include the exchange rate differentials as well.

Data sources and methodology for compiling net external debt of the Republic of Macedonia

Data sources for the net external debt of the General Government sector

-for the category debt securities (bonds and money market instruments) - for debt securities issued abroad and bought by nonresidents, data from the reporting system on external debt (CI);

-for the category debt securities (bonds and money market instruments) - for debt securities issued domestically and bought by nonresidents, data from the reports on operations with securities from the authorized participants in the Macedonian Stock exchange, as well as the data base of the Central Securities Depository are used, while for calculation of the market value of the securities, data on the market prices from the Macedonian Stock Exchange are used. For the current year, the calculation of this item is based on the stock of debt at the end of the previous year increased for the flows from the balance of payments in the item portfolio investment - debt securities.

- for the category loans the data are used from the reporting system on external debt (CI) - the credit records statistics is conveyed by the NBRM and is based on a loan-by-loan data base containing various elements. Various data can be obtained from this data base on the stock of external debt, disbursement, repayments, arrears etc.; and the reporting system on external claims (CC) - the credit records statistics is conveyed by the NBRM and is based on a loan-by-loan data base containing various elements. Various data can be obtained from this data base on the stock of external claims, disbursement, repayments, arrears etc.;

Data sources for the net external debt of the Monetary Authority sector

-for the category debt securities (bonds and money market instruments) - data from reports of the NBRM on the official foreign reserves of the Republic of Macedonia;
- for the category currency and deposits - data from reports of the NBRM on the official foreign reserves of the Republic of Macedonia;
- for the category loans the data are used from the reporting system on external debt (CI) ;
- for the category other the data are used from the reporting system on external debt (CI) and include a debt liability for SDR allocations.

Data sources for the net external debt of the Banking sector

- for the category loans the data are used from the reporting system on external debt (CI) and the reporting system on external claims (CC);
- for the category currency and deposits - data from reports of the banks on assets and liabilities - monthly balance sheet of the commercial banks;
- for the category other - the data on arrears are used from the reporting system on external debt (CI) and the reporting system on external claims (CC);

Data sources for the net external debt of the Other sectors

- for the category loans the data are used from the reporting system on external debt (CI) and the reporting system on external claims (CC);
- for the category currency and deposits - data from the monthly reports of resident accounts held abroad (MR);
- for the category short-term trade credits - data are used from the quarterly reports on the claims and liabilities on the basis of international commercial operations of residents (KIPO Form). For the current year, this category is based on estimation of the stock of debt/claims from commercial operations by adding trade credits flows from the balance of payments to the stock at the end of previous quarter.
- for the category long-term trade credits the data are used from the reporting system on external debt (CI) and the reporting system on external claims (CC);
- for the category other - the data on arrears are used from the reporting system on external debt (CI) and the reporting system on external claims (CC);

Data sources for the net external debt Intercompany lending (Direct investment)

- a basic data source for the claims and liabilities based on intercompany lending data are used: for intercompany lending in the form of loans data are used from the reporting system on external debt (CI) and the reporting system on external claims (CC), that contain information on relations between creditors and debtors with regard to ownership; for intercompany lending in the form of trade credits data are used from the quarterly reports on the claims and liabilities on the basis of international commercial operations of residents (KIPO Form); for other claims and liabilities, data from the annual direct investment survey - inward (DI 22) and outward (DI 11), which all resident legal entities submit to the NBRM on annual basis, are used.

Data for the period 2004-2005 are disseminated annually, while starting with 2006 data are disseminated quarterly, in Euro and US Dollars.

**Table no. 33 Reserve assets**

The data reflect the stock of reserve assets and other foreign assets.

Reserve assets being those external assets that are readily available to and controlled by the monetary authorities, consist of: monetary gold, SDRs, reserve position in the Fund and foreign exchange assets.

The components of reserve assets are defined in accordance with the methodology of the International Monetary Fund (Balance of Payments Manual, fifth edition).

The stock of reserve assets is calculated using the mid exchange rate of NBRM on the day for which the data are disseminated.

Monetary gold

Gold: The category monetary gold encompasses gold handled by the NBRM, consisting of gold in the NBRM's treasury, gold granulates, monetary gold deposited in foreign banks and monetary gold in transport.

Gold deposits: Gold deposits consist of term deposits in gold with foreign banks for a longer period of time.

Foreign exchange

Deposits with foreign banks: This category comprises of foreign exchange on nostro accounts with foreign banks, assets with foreign banks used as coverage for opened letters of credit and guarantees, placements in subordinated deposits in foreign currencies with non-residents, as well as term foreign exchange deposits abroad.

Cash in treasury: Cash in treasury consists of cash foreign tenders of payment within the treasury, foreign exchange cheques received at the counter, cheques sent abroad for settlement, as well as cheques received for settlement by domestic banks.

Securities: This category includes the foreign exchange assets placed in debt coupon and discount securities issued or guaranteed by foreign governments, central banks, multilateral development banks and international financial institutions, as well as foreign exchange assets placed in collateralized and agencies' bonds.

Other foreign assets

This category consists of placements in subordinated foreign currency deposits with non-residents, foreign exchange assets with foreign banks used as collateral for issued guarantees, foreign exchange assets received on accounts of the government, as well as placements in equity securities issued by non-residents (BIS equity shares) in foreign currency readily available for sale.

Table no. 34 and 35 Denar exchange rate - average in the period and in the end of the month

The average annual exchange rates are calculated as an arithmetical average of the monthly average rates.

The average quarterly exchange rates are calculated as an arithmetical average of the average monthly exchange rates in the given quarter.

The average monthly rates are calculated as an arithmetical average of the average daily exchange rates.

The exchange rates at the end of the month represents the daily middle exchange rate at the exchange rates list of the NBRM for the last day of the month.

Table no. 36 Indices on effective exchange rate of the Denar

Real Effective Exchange Rate (REER) is an index calculated by the Nominal Effective Exchange Rate Index of the Denar relative to the Relative Prices Index.

Nominal Effective Exchange Rate Index (NEER) is calculated as weighted geometric mean of the average monthly nominal exchange rates of 12 countries which are major foreign trade partners of the Republic of Macedonia (Austria, Bulgaria, Croatia, Germany, Greece, Italy, Netherlands, Russia, Slovenia, Turkey, USA and Serbia), with base period 2003=100 and overall trade weights in 2006.

The Relative Prices Index is calculated as an interrelation of the weighted average index of the prices in the selected 12 countries and the domestic price index, with base period 2003=100 and overall trade weights in 2006. Consumer Price Index (CPI), Producer Price Index (PPI) and Unit labor cost (ULC) are used as deflators.
